Proposal Title:	MAIN.FNT: DIY as Promotion – ReNo Cost Calculation, License Economics, and FAT Obligations in Modern Legal Education
Author / Presenter:	Kai Olaf Ketelhut (HdK Berlin)

Proposal Submission: 2027 SCALE Conference

Dear Members of the Selection Committee,

I am pleased to submit the attached proposal for presentation at the 2027 Eleventh Annual SCALE Conference at the Sandra Day O'Connor College of Law. As legal practice undergoes rapid structural shifts, legal education must address the intersection of technical infrastructure, cost governance, and automated workflows.

PROPOSAL ABSTRACT

This presentation explores how contemporary legal curricula must integrate **Do-It-Yourself (DIY) legal workflows**, **ReNo cost calculation** (Rechtsanwalts- und Notarfachangestellte fee structures), and legal software licensing into administrative and pedagogical frameworks. Key topics covered include:

- **ReNo Cost Calculation upon DIY:** Recalibrating legal support billing, administrative overhead, and fee structures when modular legal tools bypass traditional intermediaries.
- **License Economics & Barcode Bank Integration:** Examining standardized font metrics (`MAIN.FNT`), document indexing, and physical-to-digital asset management within legal frameworks.
- **FAT Obligations & Legacy Persistence:** Maintaining strict compliance, audit trail integrity, and file system governance across legacy `DOS` and modern legal software environments.

By connecting administrative fee economics with computer science patterns, this session equips legal educators with actionable paradigms to foster technological literacy and economic transparency among future practitioners.

Thank you for your time and consideration. I look forward to the opportunity to contribute to the discussions at ASU.

Sincerely,

Kai Olaf Ketelhut
